

CANTILEVER STYLE PAY-OFFS & TAKE-UPS

Our cantilever Pay-offs and Take-ups are known for its compact, robust, and unobtrusive design. They are available in two styles, a stationary style and a traversing style. Because of its low height, it is considered to be the most compact machine style in the industry. The stationary style of Take-up has the traverse assembly attached to the machine. The traversing Pay-off and Take-up are moving on rails in the floor, and the traverse assembly is mounted to the floor in front of the machine.

Take-up Standard Features:

- **Stationary model** with independent traverse.
- Large range of reel and product sizes.
- Advanced control system utilizing a PLC controller, programmable operator interface, safety monitoring devices, and AC drives.
- New state of the art reel drive train with a 2 year warranty.
- Holding Brake.
- Easily adjustable cable guide roller assembly.
- Speed and torque modes, with jog capabilities.
- Rapid traverse, Pause traverse, and Programmable flange delay.
- Ergonomically designed operator control stations.

Take-up Optional Features:

- **Traversing model.**
- Dancers / Accumulators for constant tension control.
- Movable cable guide stand.
- Movable dancer cable guide stand
- Guarding packages.
- Pendant stations for operator controls.
- Remote radio operator controls, for maximum visibility and mobility.
- AC servo control of traverse.
- Transducer style traverse for precise traverse control and programmable turnaround points.
- Custom designs available upon request.

Pay-off Standard Features:

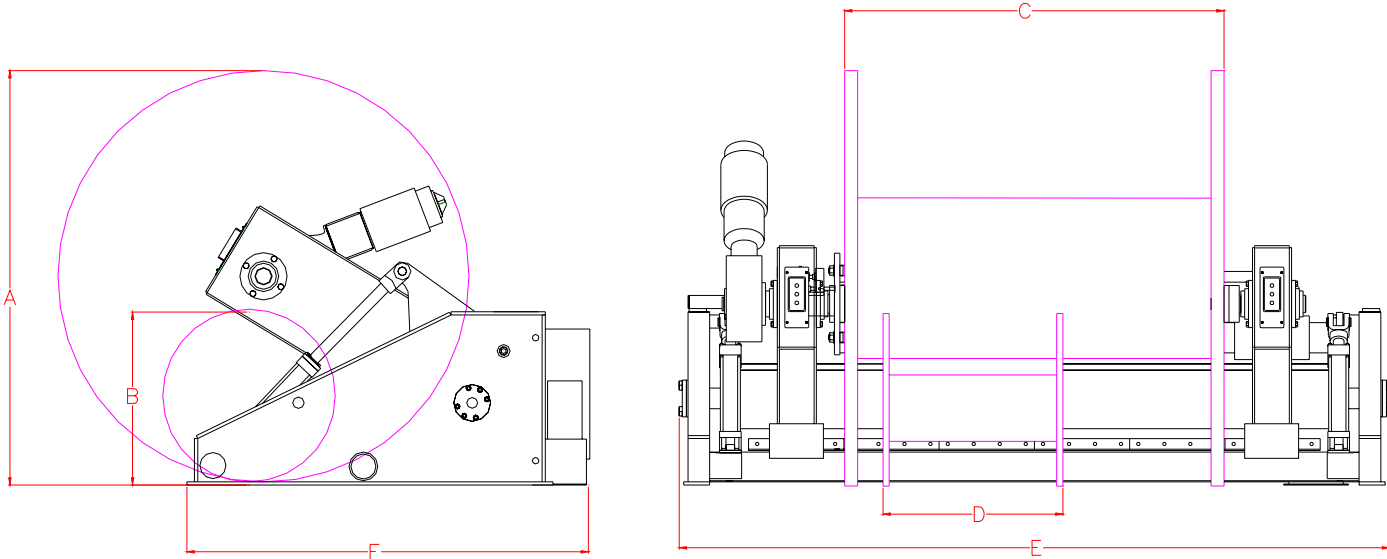

- **Stationary model** with pneumatic disc brake for tension control.
- Large range of reel and product sizes.
- Ergonomically designed operator control stations.

Pay-off Optional Features:

- **Automatic traversing model.**
- AC or DC driven models.
- Dancers / Accumulators for constant tension control.
- Guarding packages.
- Pendant stations for operator controls.
- Remote radio operator controls, for maximum visibility and mobility.
- Electric braking.
- Jog capabilities.
- On board PLC for control purposes.
- Custom designs available upon request.
